WORK & RESEARCH EXPERIENCE

Qualcomm Korea — April 2023 - Present
Senior Research Engineer — Yongsan, South Korea

- Currently working on modality-agnostic multimodal retrieval. (Submitted, Under Review)
- Learning personal concept in open-vocabulary semantic segmentation. Accepted to **ICCV** 2025.
- Enhancing edge model performance through knowledge distillation using well-generalized representations of large vision foundation models (e.g., DINOv2). Accepted to **CVPR** 2025.
- Proposed a noise-robust loss function for test-time adaptation in on-device learning. Accepted to **ICCV** 2023.

Korea Advanced Institute of Science and Technology (KAIST) — Mar 2020 - Feb 2024
Master's & PhD Student — Jeongja, South Korea

- Addressed dataset bias with disentangled feature augmentation and a bias-amplified auxiliary model. Accepted to **NeurIPS** 2021, Oral and **AAAI** 2023, Oral.
- Improved out-of-distribution detection in urban-scene segmentation by standardizing imbalanced prediction values inherent in semantic segmentation. Accepted to **ICCV** 2021, Oral.
